

## Be comfortable when you're home, save money when you're not.

Did you know that 50-75% of your home energy use is directly related to your heating and cooling system? Cutting back on the amount of energy you use can translate into big cost savings - and with ecobee, you can do it without sacrificing comfort. In fact, the average ecobee customer saved 24% on their heating costs and 21% on their cooling costs, or about \$500 each year.\*

## Access on-the-go from your computer, smart phone or tablet!

Forget to turn off the heat or AC before you left for a weekend getaway or a family vacation? Want to ensure your winter chalet is warm and toasty when you arrive, but not wasting energy while you're away? It doesn't matter where you are—you can control your ecobee thermostat from anywhere through your computer, tablet, or smart phone. In fact, 96% of ecobee customers would recommend us to their friends.

### Save more with DataRhythm Technology™

Our exclusive DataRhythm Technology helps you save more energy and money. Unlike all other programmable thermostats, ecobee thermostats have built-in DataRhythm Technology that uses a complex set of data points to make intelligent, unique and personalized heating and cooling decisions for you—resulting in more energy and cost savings.

### Home IQ™ - The Smartest Way to Track Your Energy Savings

ecobee's exclusive Home IQ provides you with unique and personalized insights into your home's heating and cooling performance, energy efficiency and savings. With Home IQ, it's never been easier to understand and manage your home energy consumption, right from your personal Web Portal!

## Success stories from ecobee users!

“What a great product!  
It performs as is stated.  
Nothing better than  
turning on the AC from my  
iPhone and coming home  
to a cool house.”

Clearly ecobee is the way  
of the future.

“I love my ecobee  
thermostats - I have two  
and within the first year I  
saved enough money on  
my oil bill to pay for my  
thermostat!”

“I use the smart phone app  
all the time to change my  
settings. I'm a believer  
in this product. No other  
thermostat can do what  
this one can!”

## More than just a thermostat!

### Easy.

ecobee thermostats are Wi-Fi enabled, so you can make adjustments on the go from your tablet, computer or smart phone. An easy-to-read, high-resolution color display and intuitive user interface makes it easy to quickly set a personalized schedule - meaning complete flexibility to work around your schedule since you don't live your life the same way 365 days a year.

### Smart.

Your ecobee thermostat can remind you to change your filters, or schedule routine maintenance so you don't have to worry about it. If there is an issue with your equipment, your ecobee will also notify you right away, which can help prevent costly equipment failures. Now that's smart!

### Green.

ecobee's Energy Modeling Team set out to discover how much energy ecobee customers are saving annually by analyzing data from a random sampling of 18,000 ecobee thermostats. The results demonstrated that the average ecobee customer saves an estimated 24% on their heating and cooling costs each year.\* In terms of dollars and cents, that's an estimated annual savings of over \$500!
